Help

procedure:

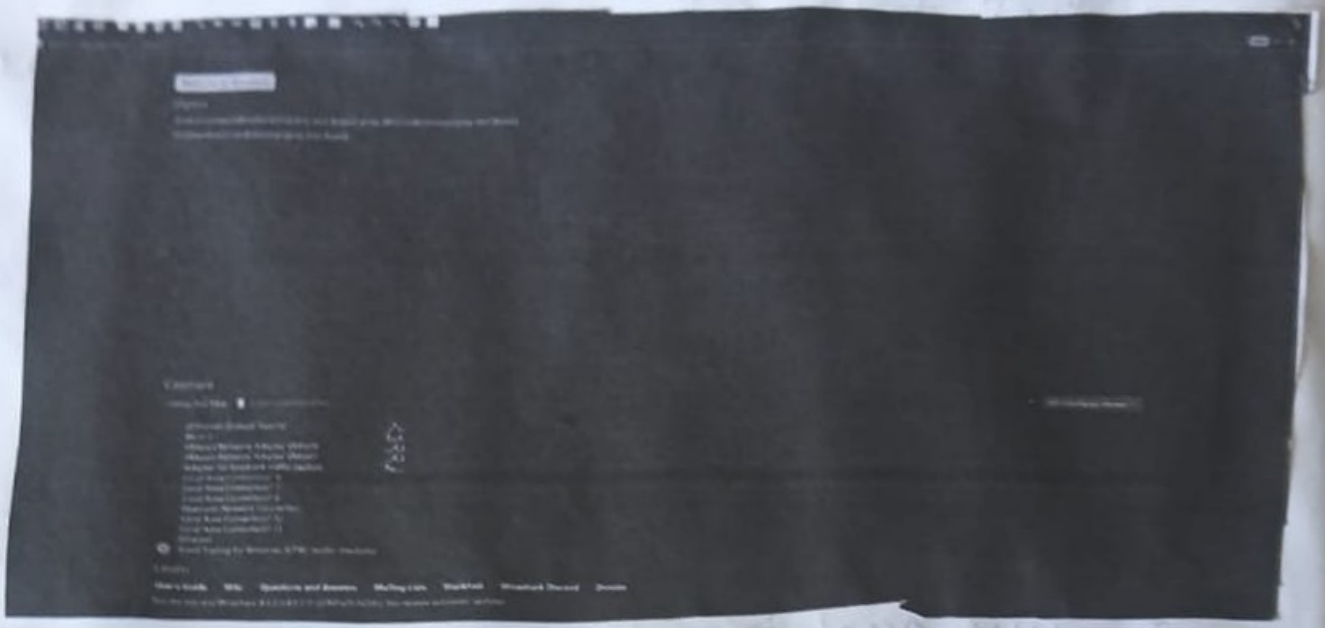

* Select the Local Area network in wireshark
* Go to capture option.
* Select Capture and Stop automatically after two packets.
* Then click Start Capture
* Save packets,

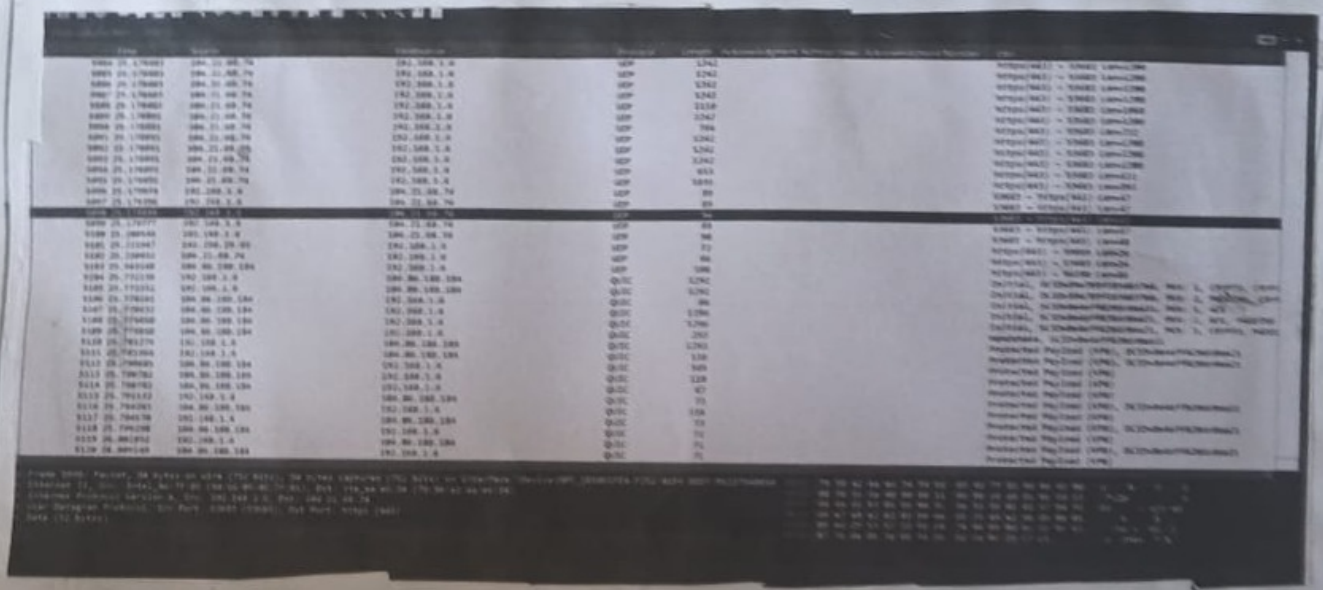

ii) create a filter to display only TCP / UDP packets, inspects the packets and provide the flow graph.

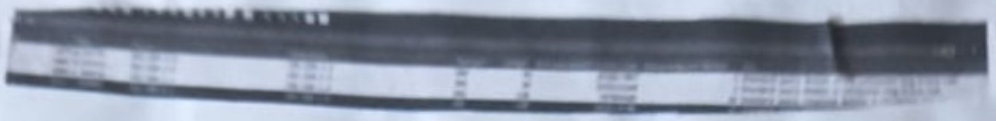

* Go to Search bar at the top of the tool.
* Search TCP packets in Search bar.
* To See flow graph click Statistics flow graph.
* Save the packets

iii) create a filter for ARP packets.

* Go to Search option
* Search ARP packet in Search bar.
* Save the packets

Result:

Therefore, the wireless is successfull implemented on the CISCO packet tracer codes executed successfully
